

Project Instructions

Project Name: Demon Slayer Data Analysis

Steps to Run:

1. Ensure Python is installed.
2. Install required libraries:
`pip install pandas matplotlib seaborn reportlab python-docx`
3. Run the file:
`python demon_slayer_data_analysis.py`

What This Code Does:

- Loads the CSV file using Pandas
- Performs basic data analysis
- Generates bar chart, scatter plot, and heatmap
- Automatically creates a PDF/Word report with insights

Output Files Generated:

- Visual plots displayed on screen
- Data Analysis Report (PDF / Word)

How to Evaluate:

- Check console output for statistics
- Review generated plots
- Open the report file for insights
